1970-1972

This report replaces Volume III of Trade of Canada Imports. By and large its contents are similar although in some cases they have been re-arranged and new tables have been added. For instance, Table 3 in the current format replaces Tables 3 and 4 in Volume III, and a table of imports by MCC divisions (2-digits) shows the cross-classification between main trading areas and Canadian regions of clearance.

The relationships between the contents of the imports monthly, quarterly, and annual publications are summarized on the following page.

Le présent bulletin remplace le "Volume III, Commerce du Canada, Importations". Le contenu de la nouvelle version du bulletin est semblable, d'une façon générale, au contenu de la version précédente quoique certains tableaux aient été réorganisés et d'autres ajoutés. Par exemple, le Tableau 3, du volume courant, remplace les Tableaux 3 et 4 du Volume III et un nouveau tableau couvre les importations par division (2 chiffres) de la MCC ventilées à la fois par zones de commerce et régions canadiennes de dédouanement.

Vous trouverez à la page suivante un tableau comparatif des diverses publications ayant trait aux importations canadiennes.

TABLEAU DE COMPARABILITE

Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken to provide for year to year comparability between classes and to outline the reasons for commodity classification changes. In January each year the Import Commodity Classification (M.C.C.) is revised and a number of changes are introduced. These changes take several forms:

1. Certain classes are re-numbered, largely to bring the MCC in line with the Standard Commodity Classification (SCC) or to provide for future expansion of the classification, e.g. 1971 class 790-39 became class 793-90 in January 1972.
2. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes, e.g. class 046-59 was split into classes 046-20 and 046-59 in January 1972.
3. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class, e.g. 1971 classes 377-71 and 377-75 were combined in January 1972 to form a new class 377-73.

The commodity classification therefore evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not always possible to provide, in the framework of a report, comparable data for the previous year's trade.

Classification annuelle des modifications et comparabilité statistique d'année en année

Ces notes ont pour but de décrire les mesures prises pour assurer une comparabilité annuelle entre les classes et d'exposer les raisons qui ont motivé les modifications apportées à la classification des marchandises. On revise la classification des marchandises d'importation en janvier de chaque année et on y introduit un certain nombre de modifications. Voici les genres de modifications apportées:

1. Certaines classes sont renumérotées, principalement pour rendre la classification des marchandises d'importation conforme à la Standard Commodity Classification (SCC) ou pour permettre un élargissement subséquent de la classification; p. ex. la classe 790-39 de 1971 est devenue la classe 793-90 en janvier 1972.
2. On introduit un certain nombre de nouvelles classes pour permettre une définition plus précise des principales marchandises vendues sur le marché. Pour ce faire, on divise une classe existante en une ou plusieurs nouvelles classes; p. ex. la classe 046-59 a été divisée en deux classes en janvier 1972: 046-20 et 046-59.
3. Parfois, lorsque le volume du commerce ne justifie pas une classification séparée, certaines classes sont intégrées à d'autres classes ou annexées à la classe résiduelle (n.d.a.) d'un groupe; p. ex. les classes 377-71 et 377-75 de 1971 ont été fusionnées en janvier 1972 pour former une nouvelle classe, 377-73.

Par conséquent, la classification des marchandises évolue afin de tenir compte de la composition changeante du commerce international du Canada et de mieux répondre aux exigences des utilisateurs. Ce procédé comporte un inconvénient inévitable: lorsque le contenu ou la numérotation des classes de marchandises est modifiée, il n'est pas toujours possible de fournir, dans le cadre d'un rapport, les données correspondantes pour le commerce de l'année précédente.

In order to eliminate this problem the following measures were adopted:

1. A class for which the code changed in 1971 or 1972 is shown with its current code whether
 - a) it retained the same content or
 - b) changed in content.
2. Where a previously existing class was split into several, in either 1971 or 1972 the newly created classes were
 - a) recombined and shown under the code of the previous class, or under the most appropriate current code;
 - b) shown under the current codes where it was possible to make the split retroactive;
 - c) left unchanged when a retroactive split was not feasible and where the new codes were in existence for the two latest years.
3. Where previously existing classes were combined into one, in either 1971 or 1972, the data are shown under the current code.
4. Where changes in class definition and content made it impossible to achieve comparability over time for any of the specific classes involved the commodities concerned were:
 - a) aggregated for each of the 3 years, combined with the appropriate residual class and shown under its code, e.g. class 798-99;
 - b) aggregated for each of the 3 years and shown under a "dummy" class code;
 - c) left unchanged where none of the above alternatives was feasible.

Afin d'éliminer ce problème, nous avons adopté les mesures suivantes:

1. Une classe dont le code a été modifié en 1971 ou 1972 est indiquée avec son code actuel,
 - a) que son contenu soit le même, ou
 - b) qu'il soit différent.
2. Lorsqu'une classe déjà existante a été divisée en plusieurs classes, que ce soit en 1971 ou 1972, les nouvelles classes créées ont été
 - a) refusionnées et inscrites sous le code de l'ancienne classe, ou sous le code courant le plus approprié;
 - b) inscrites sous les codes courants, lorsqu'il était possible de donner à la division un caractère rétroactif;
 - c) laissées intactes lorsqu'une division à effet rétroactif était impossible et que les nouveaux codes existaient depuis les deux dernières années.
3. Lorsque des classes déjà existantes ont été fusionnées en une seule, que ce soit en 1971 ou 1972, les données figurent sous le code courant.
4. Lorsque les modifications apportées à la définition ou au contenu d'une classe ne permettaient pas la comparabilité dans le temps pour l'une ou l'autre de ces classes, les marchandises visées étaient:
 - a) réunies pour chacune des trois années, intégrées à la classe résiduelle appropriée et inscrites sous le code de cette classe; p. ex. 798-99;
 - b) réunies pour chacune des trois années et inscrites sous un code de classe fictif;
 - c) laissées intactes lorsque ni l'une ni l'autre des deux solutions précédentes n'étaient possibles.

5. Where only class content changed, the original class code was retained.

In some instances units of quantity are changed as part of a continuing program to standardize the unit in the various economic statistics published by Statistics Canada. Where such changes took place, quantities were converted to a unit common to all the periods covered by this report.

Users should note that the equivalence table shown below is presented in the sequence of the publication code adopted for this report. To that extent the sequence of any of the classifications used in the period 1970-1972 is not respected. Besides, any class in existence during that period may be shown in several places in the equivalence table.

In the table below, the number appearing in the NOTE column refers to the type of measure adopted to ensure comparability.

5. Si les modifications ne visaient que le contenu d'une classe, on conservait le code de classe initial.

Il arrive que des unités de quantité soient modifiées dans le cadre d'un programme continu pour normaliser l'unité de diverses statistiques économiques publiées par Statistique Canada. Dans ce cas, les quantités étaient converties en unités communes à toutes les périodes couvertes par ce rapport.

Les utilisateurs doivent prendre note que le tableau d'équivalence ci-après est présenté dans l'ordre du code de publication adopté pour ce rapport, de sorte qu'on ne tient pas compte de l'ordre des classifications utilisées pour la période 1970-1972. De plus, il est possible que les classes utilisées au cours de cette période apparaissent à plusieurs endroits dans le tableau d'équivalence.

Dans le tableau ci-après, le chiffre apparaissant dans la colonne intitulée NOTE renvoie au genre de mesure adoptée pour assurer la comparabilité.

4. Imports by Division and Trading Area 1970 - 1972.....	4. Importations par division et zone de commerce 1970 - 1972..... 846

1. **Source of Data:** Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.
2. **Timing:** Import statistics for any month include goods declared on import entries received at Statistics Canada up to the last working day in the month. Generally speaking, compilation is based on a statistical month rather than a calendar month: e.g. imports of motor vehicles from the U.S.A. cover the period from the 26th of one month to the 25th of the following month. There could also be a lapse of up to a week in the receipt of documents from outlying customs ports.
3. **Coverage:** Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements are *excluded* from import statistics: gold and gold products where the value of the gold content is 80 per cent or more of the total value, including coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.
4. **Classification:** Commodities are classified to the *Imports Commodity Classification* (MCC), a 5-digit classification based on the Standard Commodity Classification (cf. Cat. 12-502, Statistics Canada). Full descriptions and a definition of contents of each commodity code in the MCC are provided in *Import Commodity Classification*, Vols. I, II, and III (cf. Cat. 12-524, 12-525, 12-526, Statistics Canada). Importers, when reporting to the Department of National Revenue, Customs and Excise Branch, use an expanded version of the MCC coded at the 7-digit level — The Canadian International Trade Classification.
5. **Country and area of consignment:** Imports are credited to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin. Statistics are compiled and presented for the individual countries listed on page VIII of this report. Countries are arranged primarily according to geographical location, but they are also grouped by affiliation to trading blocs and by tariff arrangements (e.g. E.E.C. and Commonwealth and preferential countries). In the statistics shown in this report, *European Economic Community excludes Denmark, Ireland and the United Kingdom, new members from January 1, 1973.*
6. **Quantities:** Table 3 shows quantities, where available, in terms of the units specified for each class in the «Import Commodity Classification, Vol. I» (cf. above), and defined on page VII of this report. Measures of weight or volume generally exclude any packing required for shipment and numbers refer to complete (or substantially complete) units imported, excluding parts.
1. **Source des données:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices.
2. **Périodes de temps:** La statistique des importations pour un mois quelconque comprend les marchandises déclarées dans les documents d'importation parvenus à SC durant ce mois, jusqu'au dernier jour ouvrable inclus. En général, le calcul est basé sur un mois fixé pour les besoins de la statistique plutôt que sur un mois civil: par ex. les importations de véhicules automobiles des États-Unis couvrent la période du 26 d'un mois au 25 du mois suivant. Il peut également y avoir un décalage d'une semaine avant l'arrivée des documents provenant des postes de douane éloignés.
3. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Les mouvements de marchandises suivants sont *exclus* de la statistique des importations: l'or et les articles en or dont la valeur de la teneur en or représente 80 pour cent de la valeur totale, y compris la monnaie; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par des diplomates étrangers au Canada ou rapportées par les Canadiens rentrant de leur service à l'étranger; les importations provisoires pour des expositions ou des concours, y compris les films. Les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens, les importations provisoires et les marchandises ne faisant que passer par le territoire canadien, ne figurent dans aucune statistique.
4. **Classification:** Les marchandises sont classées dans la *Classification des marchandises d'importation* (MCC), qui est la classification à 5 chiffres basée sur la *Classification type des marchandises* (cf. publication no 12-502 au catalogue, Statistique Canada). Une description complète et une définition du contenu de chaque code de marchandise figurant dans cette classification (MCC) se trouvent dans les Vols. I, II et III (cf. publications numéros 12-524, 12-525 et 12-526 au catalogue, Statistique Canada) de la *Classification des marchandises d'importation*. Lorsque les importateurs font leur déclaration au ministère du Revenu national, Division des douanes et accise, ils se servent d'une version plus complète de la MCC, codée à 7 chiffres, intitulée *La classification canadienne pour le commerce international*.
5. **Pays et région de consignment:** Les importations sont attribuées selon le pays dans lequel elles ont été consignées à destination du Canada, sauf en ce qui concerne les marchandises provenant de l'Amérique centrale ou de l'Amérique du Sud qui sont expédiées au Canada par les États-Unis; ces marchandises sont attribuées au pays d'origine. Les données statistiques sont calculées et présentées pour chaque pays mentionné à la page IX de la présente publication. Les pays sont disposés surtout selon leur situation géographique, mais ils sont également répartis d'après leur affiliation à des groupes commerciaux et leurs accords tarifaires (par ex. les pays de la C.E.E., ceux du Commonwealth et les pays qui jouissent d'un tarif préférentiel). Dans les statistiques qui figurent dans la présente publication, la *Communauté économique européenne n'inclut pas le Danemark, l'Irlande et le Royaume-Uni, nouveaux membres depuis le 1er janvier 1973.*
6. **Quantités:** Le tableau 3 donne les quantités, lorsqu'elles sont disponibles, exprimées dans l'unité déterminée pour chaque classe dans la *Classification des marchandises d'importation*, Vol. I (mentionnée ci-dessus); les unités sont définies à la page VII du présent rapport. Les poids ou les volumes sont mesurés nets de l'emballage nécessaire à l'expédition et les nombres représentent le nombre d'articles complets (ou presque complets) exportés, sans les pièces.

7. **Valuation:** The value of goods imported is based on the selling price f.o.b. point of shipment reported by importers. However, in the case of shipments valued under \$50,000 or transactions between affiliated companies (other than automotive imports from the U.S.), the value recorded is the value for customs duty purposes determined according to the provisions of the Custom Act. All values in this report are presented in thousands of dollars, after appropriate rounding. Where the current or cumulative amount is less than \$500, only quantity may be published for the country concerned. On account of rounding individually, differences may arise between totals and sums of constituent items.
8. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page VIII of this report, and comprehensive descriptions of commodities appear in the «Import Commodity Classification, Vol. 1». The letters «n.e.s.» mean «not elsewhere specified».
9. **Treatment of Confidential Information:** In a few instances, the publication of country or commodity detail would involve disclosure of the operations of a specific importer. In such cases the figures affected were deleted. This does not affect the corresponding commodity or country totals.
7. **Valeurs:** La valeur des marchandises importées est basée sur le prix de vente, f. à b., au point d'expédition déclaré par les importateurs. Toutefois, dans le cas des expéditions d'une valeur inférieure à \$50,000 ou des transactions entre des sociétés affiliées (autres que les importations d'automobiles des Etats-Unis), la valeur déclarée est celle fixée aux fins des douanes, en vertu de la Loi canadienne sur les douanes. Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars, après avoir été arrondies. Lorsque la valeur cumulative ou courante est inférieure à \$500, seul la quantité peut être publiée pour le pays concerné. Etant donné que l'on a arrondi chaque valeur, il est possible que les totaux ne correspondent pas aux sommes des éléments constitutifs.
8. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page IX du présent rapport, tandis que les descriptions complètes des marchandises figurent dans la *Classification des marchandises d'importation*, Vol. I. (mentionnée ci-dessus). Les lettres «n.d.a.» signifient «non désigné ailleurs».
9. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel des données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par classe ou pays, qui comprennent toutes les opérations dont il a été fait rapport.

Les pays avec lesquels les échanges commerciaux du Canada sont peu importants ont été regroupés avec un territoire adjacent ou apparenté.
